American Fuel & Petrochemical Manufacturers Washington, D.C.

Non-profit organization headquarters
relocation

dc
DESIGN

Davis Carter Scott (DCS) assisted American Fuel & Petrochemical Manufacturers (AFPM) with their 23,000 SF relocation to 1201 Eye Street, NW in Washington, DC. The new offices provide a combination of closed offices and open work areas. DCS was able to incorporate more energy and collaboration in their new space by locating corridors adjacent to small meeting spaces. Wood finishes and natural tones are accented with bright colors that echo the associations branding.
