Services:
Architecture
Interior Architecture
Construction Administration

Project Description:
Highland School in Warrenton Virginia engaged Davis Carter Scott to provide architectural services for their new Lower School Building and latest Middle School Renovation. The Middle School renovation begins where a covered breezeway for the Lower School ended. The Middle school will now feature a formal entry way with interior lobby as well as classroom upgrades. This was a key feature in integrating the middle school with the rest of the school. Improvements continue through out the existing school including wireless technology, lighting and MEP Systems which were replaced with high performance components.

DCS created a new Central Academic Resource Center which under went significant upgrades in order to transition from a traditional library to a technology based center. Additional improvements include renovation of the gymnasium, new harkeness room, computer labs, adminstration offices, school store and exterior facade upgrades.
