Northrop Grumman  
Falls Church, Virginia  
LEED™ CI Gold

Interior Architectural Services for a LEED  
CI Gold certified corporate office

Davis Carter Scott designed this client's new 350,000 square foot corporate offices which includes a conference center, a full service cafeteria, SCIF areas, credit union, retail coffee bar, various meeting rooms, and training rooms. The remainder of the space is configured in a mixture of closed office and open workstation environment. This unique mixture of space allows employees the benefit of additional privacy, while also providing the majority of staff exposure to natural light through the use of a glass-fronted system. The project also included the creation of a pedestrian bridge from the existing parking garage to the facility. Branding, efficiency of space, and security were main priorities for the team when designing the space. Team synergy between the client, design and construction teams was critical in delivering a fast-track project in under one year. In addition, the headquarters was designed to LEED CI standards and achieved LEED CI Gold.
