Services:
Master Planning
Architecture
Construction Administration

Project Description:

Davis Carter Scott provided masterplanning and Basebuilding Architecture Services for this mixed-use development which features 137,000 SF of hospitality space. The Westin Suites Hotel features 191 Rooms, 63 of which are suites. The development also includes an 80-seat restaurant and bar. The project is part of a 950,000 SF mixed-use complex featuring 130,000 SF office building and a detached garage.

The hotel is designed in a Neo-Classical style with a clearly defined base, body and top. The body is wrapped in a two tone pre-cast. This method was used to delineate the pilasters to create a dynamic visual element in the design. The color of the pre-cast was selected to accent the two tone pre-cast found on the adjacent office building. The top is defined by a return to a solid pre-cast color with a pitched metal roof. This element was critical in meeting the Reston Architectural design guidelines which call for pitched roofs that harmonize with colonial architecture.

Westin Hotel at Reston Square Reston, Virginia
